

MAGO 4S

**MULTIPLE SOLUTIONS
INFINITE POSSIBILITIES**

- **Food Intolerance & Allergy**
- **Autoimmune Panel** - Celiac Disease - Rheumatic Disease - Vascular Diseases
- **Hepatitis Panel**
- **TORCH/EBV Panel**
- **Hormones Panel** - Fertility - Steroids - Thyroid
- **Tumor Marker Panel**

**Automation of ELISA, IFA
and agglutination tests
processing simultaneously
in one batch**

**120
sample
positions**

**User friendly software
with touch screen and
Windows 10 platform**

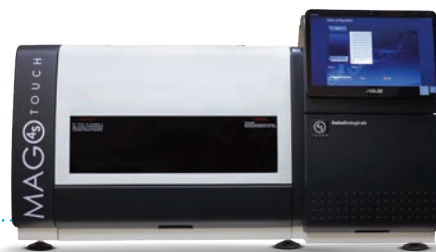

**Levey-Jennings
and Westgards
rules program
on board**

The maximum flexibility into the lab: ELISA and IFA tests contemporary.

Walk-away system that allows processing of samples in ELISA, IFA, hemoagglutination (TPHA), seroagglutination (Widal-Wright) and Allergy (specific IgE capture procedure) simultaneously.

MAGO 4S

Automated Analyzer

Functional characteristics

- Ability to perform multiple assays per sample.
- Liquid sensing mechanism reliability.
- Pre-assay plate and reagent volume check.
- Delta Biologicals reagents in ready to use containers.
- Serial two-fold dilutions performed on-board.
- User friendly Windows 10 based software.
- Integrated ELISA reader, halogen lamp, (interference filters 405, 450, 492, 620 (two free positions)).
- Performs up to 12 ELISA test (per plate) or up to 16 IFA test.

Technical features

Dimensions

- 120x70x60 cm

Weight

- 80 kg

Power Supply voltage

- 115-230 Volts

Computer characteristics

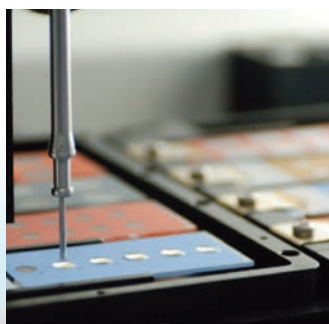

- 15,6 flat colour monitor
- Pentium® processor
- 500 GB hard disk
- 4GB RAM
- USB Port, serial port, ethernet port
- Windows 10 software platform

Separate built/in compartment for compressor and hydraulic system.

An independent incubation modules for each plate.

IFA tests on slides are performed as screening and/or titration, with a serial dilution capability.

Software direct placement of reagents and the amount of each reagent needed.

Specifications are subject to change without prior notice.
Pictures used only for representation purposes-subject to change without prior notice.
